

Custom Views — screenshot evidence (Zoho CRM vs TAVI CRM)

Captured 3 Oct 2026, headless Edge 1600×900. Zoho: org940103646, Leads module, admin account. TAVI: crm.taviportal.com (NDC-Staging), Leads module, owner account, List view. Nothing was saved on either side; a temporary Kanban view created in Zoho for A15–A17 was deleted afterwards.

Each item has `<id>-zoho.png` (feature present, green banner), `<id>-tavi.png` (feature missing, red banner) and `<id>-compare.png` (both side by side). Red boxes mark the control, or the place where it should be. Ids follow `custom-views-missing-list.md` : A = NDC-1869 items, B = new gaps.

Id	Gap	Zoho (present)	TAVI (missing)	Note
A1	Collapse / expand each group in the view picker	A01-zoho	A01-tavi	Group names are plain labels — no collapse/expand
A2	Manage custom views page grouped by type	A02-zoho	A02-tavi	One flat table with "All custom views" / "Public views" tabs — not grouped by type
A3	"Between" / "Not between" for number fields	A03-zoho	A03-tavi	Number operators (Deals > Amount): no between / not between. List: Equals Not equal to Greater than Less than $\geq \leq$ Is empty Is not empty

B11	More selection / module actions	A20-zoho	A19-tavi	No Cadences, Print Mailing Labels, Print Using Canvas or Export Selected Records

Notes

- A12 (select all in view): Zoho has only 22 leads, which fit on one page, so the "Select all N records" prompt could not be shown; the Zoho screenshot is the page-selection state only.
- A15–A17 (Kanban): Zoho screenshots use a temporary Kanban view "QA CV temp (delete me)", deleted after capture. The Zoho org has no rollup field, so A17 shows the Aggregate By list (number fields) rather than a rollup entry.
- A18: Zoho has no screen for this; it refuses the delete through the API when a view is in use. Only the TAVI dialog is shown.
- A7/A8: Zoho screenshot is Setup → Profiles → Standard → Others ("Manage Views": Chart View, Custom View, Kanban View, Split View, Timeline View). TAVI screenshot is Settings → Permissions for CRM Admin ("Manage Shared Views" only).
- B1: the TAVI toolbar shows "Filter 1" with a Lead Status = Busy filter applied and no Save filter button; the filter was cleared afterwards.

Test Cases Affected by Missings

Source: Custom Views - Spec v3 Test Cases.xlsx (238 cases). A case is listed when it tests a missing function directly (the 50 gap cases, status "Missing"), or when its expected result includes a missing function (10 cases also set to "Missing"), or when it checks a list that the missing operators belong to (CVS-D01, status blank — it passes on today's build). Ids: A = NDC-1869 item number, B = new gap in custom-views-missing-list.md Part B; the screenshots above use the same ids.

61 test cases are affected.
